HOME BUILDING BOOK

WITH PLANS OF
MODERN BARN

THE T. EATON CO. LIMITED
WINNIPEG - CANADA

WE QUOTE ON ANY PLANS OF HOUSES OR BARNs

Home Requirements Vary

This is a country of initiative, where people think for themselves. It is only natural then that they should have their own ideas of how they would like their homes to be built. No two people fancy the same layout, therefore you may require a design suitable for your individual taste, and also special quotations as to cost of materials.

We Specialize in this Type of Estimating

We believe we can save you money on any design — be sure to get our estimate.

Send us a picture or pencil sketch, and a drawing of how you wish the rooms arranged. State fully anything special you wish taken care of and we will quote you the latest, low **EATON** price on the material required to construct your home.

Further, upon receipt of your order for lumber and millwork, **without extra charge** we will provide you with a set of Blueprint Working Plans, with full specifications of material. This will help you to build intelligently, without misunderstanding between yourself and the contractor.

Here's How You Save When You Buy EATON Lumber

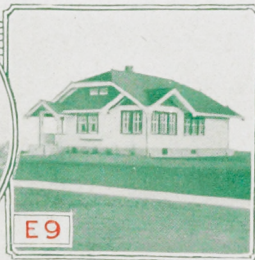

First—Our cash buying policy is a saving policy for the consumer.

Second—For the customer cash payment is cheaper than paying a "long term price."

Third—We do not yard or re-grade our lumber; we ship from the mill to you. It is cheaper to buy from **EATON'S** direct than pay several dollars per M for yard handling and extra charges for yard overhead. Somebody pays this in grades or price. Order from **EATON'S** and save yourself such extra costs.

**Better Grades at No Greater Cost—
Often Very Much Less**

Read what Mr. Batters, of Portage la Prairie, says—page 7.

The SAFE WAY TO BUILD A WARM HOUSE FOR THE WEST

EATON CONSTRUCTION

For Comfort and Dependability

What will your story be when the new home has been built? When you sit back in the old easy chair, with the elements playing upon your new house, what will its condition be—cold as a barn or warm and cosy? floors sagging and squeaking or pleasingly smooth, level and solid? walls bulging here and warping there or straight plumb and beautifully aligned? creaking with vibration or walls rigidly sub-supported, with plaster solid for a generation? It all depends on the construction you choose.

Will that construction be flimsy or safe and substantial? It all depends on **YOUR CHOICE**. The straight road to satisfaction in house construction is **EATON Construction for the West**.

Study the illustrations; follow them closely, and **insist** on this construction, no matter who quotes on the cost.

SPECIFICATIONS

FRAMING—No. 1 Common Fir, approved sizes for the respective purposes, at 16-inch centres, excepting where otherwise marked on plans.

SHEATHING, and Sub-Floor, Inside and Outside Walls and Roof Boards—No. 1 Fir Shiplap, 8-inch and 10-inch; sub-flooring to cover main floor only.

SIDING—1x4-inch No. 1 and 2 Fir Novelty Siding.

SHINGLES—No. 1 XXX B.C. Shingles.

EXTERIOR FINISH—No. 1 and 2 Clear Fir Stock, surfaced four sides. Poreh ceilings and wide cornice soffits in 3/4x4-inch No. 1 and 2 Fir; V-joined ceiling.

LATH—No. 1 Fir.

FLOORING—On all porches and main floor we furnish 1x4-inch No. 1 and 2 E.G. Fir Flooring, 3 1/4-inch face measure. Second floor, 1x4-inch No. 3 Fir Flooring.

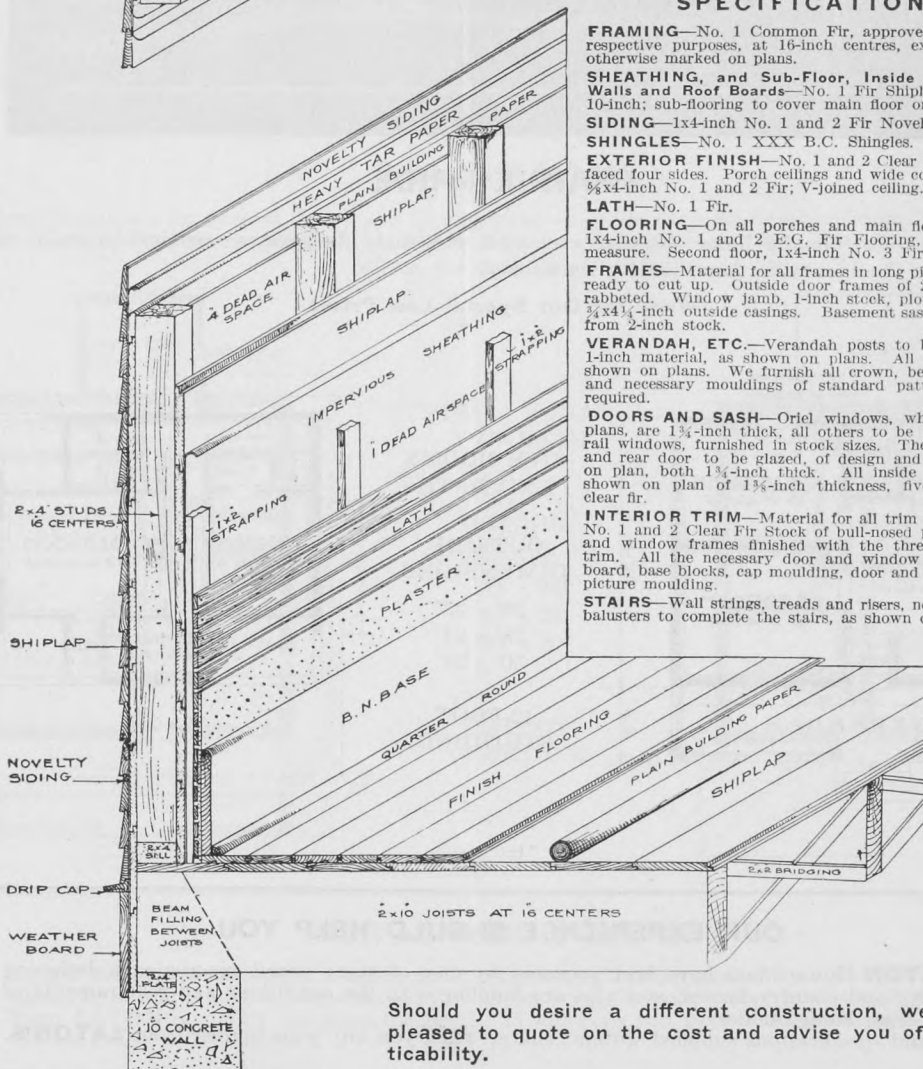

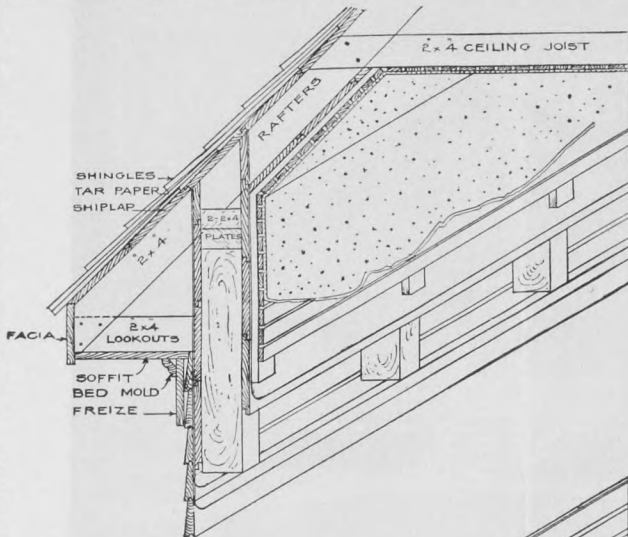

FRAMES—Material for all frames in long pieces, machined ready to cut up. Outside door frames of 2x8-inch stock, rabbeted. Window jamb, 1-inch stock, plowed. All with 3/4x4 1/2-inch outside casings. Basement sash frames made from 2-inch stock.

VERANDAH, ETC.—Verandah posts to be built up of 1-inch material, as shown on plans. All balustrades as shown on plans. We furnish all crown, bed, cove, lattice and necessary mouldings of standard patterns that are required.

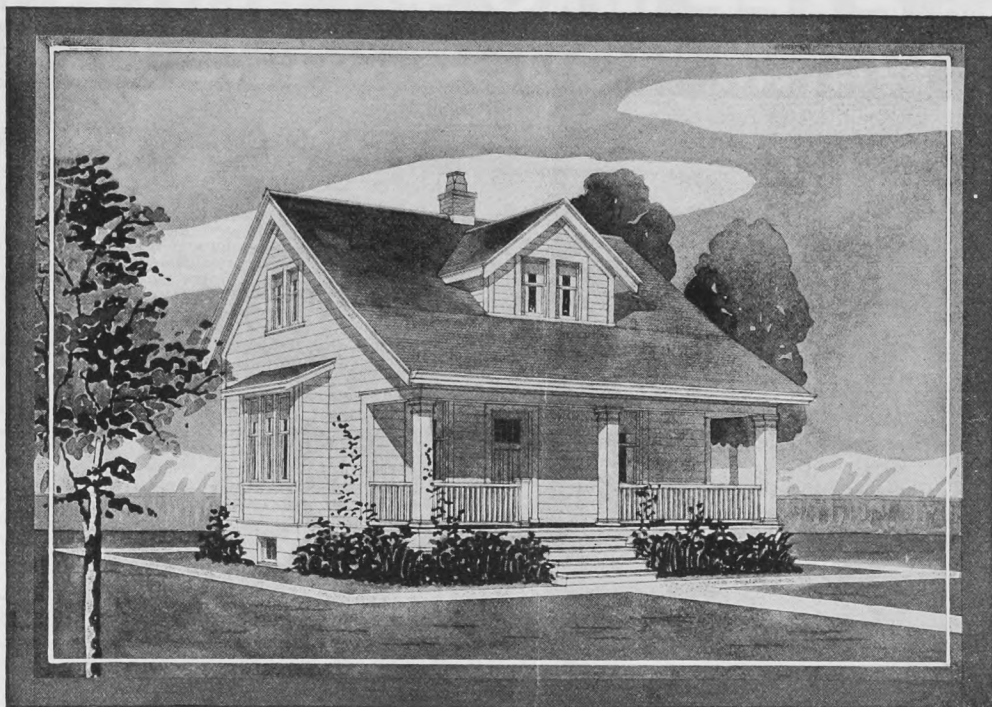

DOORS AND SASH—Oriel windows, where shown on plans, are 1 3/4-inch thick, all others to be 1 1/2-inch check rail windows, furnished in stock sizes. The outside front and rear door to be glazed, of design and size as shown on plan, both 1 3/4-inch thick. All inside doors of sizes shown on plan of 1 3/4-inch thickness, five cross panel, clear fir.

INTERIOR TRIM—Material for all trim is furnished of No. 1 and 2 Clear Fir Stock of bull-nosed pattern. Door and window frames finished with the three-member cap trim. All the necessary door and window casings, base-board, base blocks, cap moulding, door and window stops, picture moulding.

STAIRS—Wall strings, treads and risers, newels, rail and balusters to complete the stairs, as shown on plans.

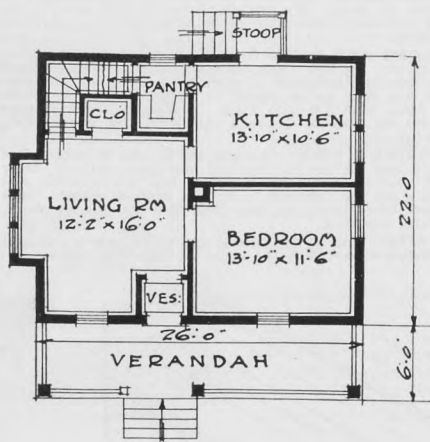

Should you desire a different construction, we will be pleased to quote on the cost and advise you of its practicability.

CORRECT PLANS SAVE MONEY

You should have proper working drawings before starting to build; have everything understood and put on paper, then your contractor can figure your cost intelligently, without handing you a heavy bill of extras when his work is finished.

READ WHAT YOUR NEIGHBORS SAY ABOUT EATON LUMBER

BETTER LUMBER—BETTER SERVICE FULLER QUANTITIES—LOWER PRICE

These are letters from men who have bought and men who have used our lumber. Read their statements of quality and economy. This is the evidence, the proof submitted by your neighbors, which more than justifies our claims.

EATON Lumber is Best for the Western Farmers

The quality is superior; our customers tell us so. Here's the reason why: We ship from reputable mills, direct from the mill grader to you; there is no re-sorting; you get the original high standard mill grades. That's why you get better lumber at EATON'S.

Order from EATON'S—It Pays.
Your Neighbors Say So. Read—

Glasgow, Man.
T. Eaton Co. Ltd.,
Dear Sirs:
In reply to your letter must say the carload of lumber for house purchase from you in the Spring was more than I expected.
All the lumber was good. When we unloaded it at Glasgow the neighbors came to see it and said "you could not get lumber like that round here at that price." and your service was very satisfactory.
Yours truly,
Wm. D. Madden

Gimli, Man.
The T. Eaton Co.,
Winnipeg.
Gentlemen:
I should like to tell you how pleased I was with the carload of lumber and the millwork I ordered from you this summer.
After comparing prices from several firms I found your quotation about one hundred dollars lower than any of the others. The quality of the material was excellent. I wish, also, to commend the very prompt delivery of the order - see, no doubt, to the careful attention you gave it.
Yours truly,
J. J. Gannon

Morris, Man.
To The T. Eaton Co.,
Winnipeg.
Dear Sirs:
Since 1917 I have purchased lumber and am pleased to say that all the lumber and other building material bought from you has been the very best grade. So far as my experience reaches your service couldn't be much improved.
Yours truly,
Rita & Bermet

St. Claude, Man.
The T. Eaton Co.,
Dear Sirs:
In reply to yours of 21st inst., I can say that I was highly satisfied with the lumber you sent me for building my barn both as to quality and quantity. In fact, I have some left over of every kind, specially paint, etc., and I consider that I have made a big saving in ordering from you, so say nothing of the convenience of having everything ready when you begin building.
Yours truly,
Hank Furst

Wawerton, Sask.
T. Eaton Co. Ltd.,
Winnipeg.
Dear Sirs: The shipment of lumber I received in good condition, and was the cheapest I could get in the market.
Yours truly,
Harry Bowdler

Panburn, Sask.
The T. Eaton Co.,
Gentlemen:
In your car of lumber. I wish to state I was perfectly satisfied. It was up to my guarantee in every respect. Several of my neighbors who helped me handle it thought the quality exceptionally good. I am convinced if conditions warrant any building you will receive several orders from this neighborhood next fall.
Yours truly,
J. J. B.

Portage la Prairie, Man.
The T. Eaton Co.,
Received your kind letter today asking for a statement of how I found the lumber in my dwelling. I must say all lumber used while building was of the best and better still, I saved about five hundred dollars.
I cannot speak too highly of the Eaton Co. and those connected with it and will be only too glad to recommend your lumber to all builders.
Yours truly,
R. J. Kather

Eastbrook, Sask.

Adams, Sask.
T. Eaton Co. Ltd.
Dear Sirs:
The several cars of lumber I have purchased from you have been very satisfactory. The lumber was as good a grade and often better than was sold in the local yards for 25% more money. In every car I received more lumber than the invoice called for; in no place have I found a shortage.
Yours truly,
T. W. Sealey

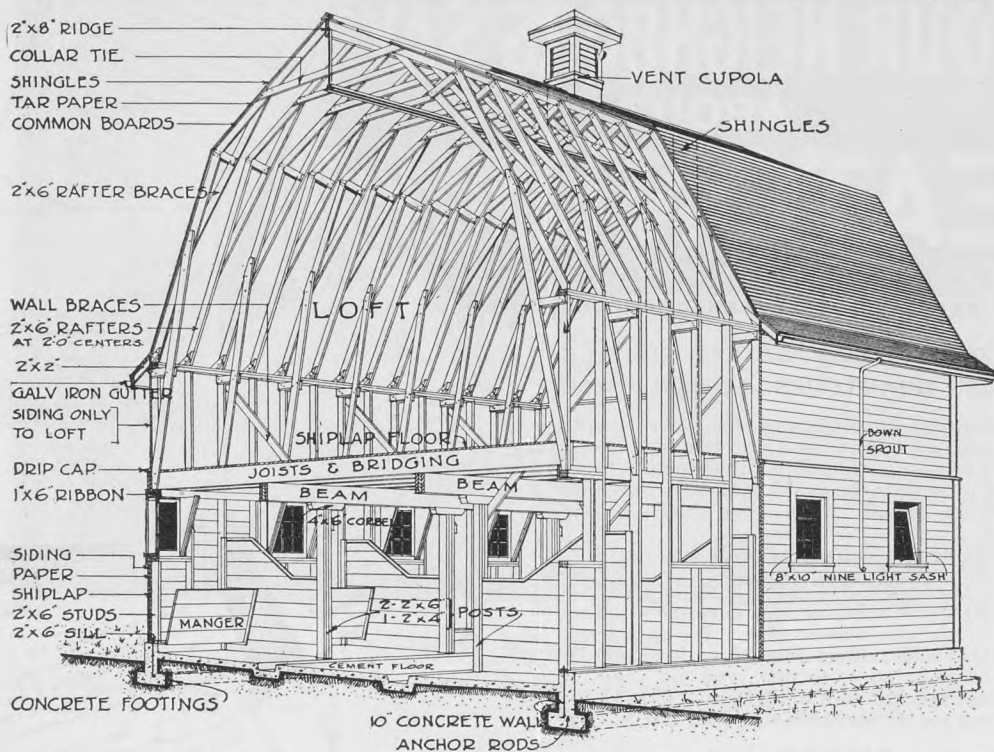

The T. Eaton Co.,
Winnipeg.
Dear Sirs:
My experience with the T. Eaton Lumber Dept. is that it gives good and prompt service. The lumber I found was up to grade and full feet measurement.
I am well satisfied in buying from them.
Yours truly,
Wm. Higgins

Artland, Sask.

T. Eaton Co. Ltd.
Dear Sirs:
The car of lumber which I ordered from you was in first class shape and of good quality. I was well satisfied with the quick returns.
Yours truly,
S. W. Graham

HOW TO BUILD A BARN IN THE WEST

SPECIFICATIONS OF MATERIAL FURNISHED FOR OUR BARN DESIGNS

POSTS AND GIRDERS—Built up of 2-inch material of No. 1 Common Fir Dimension S1S1E, in lengths most suitable.

FRAMING—All joists, studding and rafters of the lengths as shown on plans spaced 24 inches on centre throughout.

SIDING—The body of the building entirely enclosed with 1x6 No. 3 Clear Fir Drop Siding, with the walls lined up to loft floor with No. 1 Fir Shiplap.

ROOF SHEATHING—For the roof, 1x8 or 10-inch No. 1 Common Fir Boards S1S of sufficient quantity to close board the roof.

SHINGLES—All shingles No. 1 XXX B.C. Red Cedar Shingles laid 5 inches to the weather.

HAY LOFT FLOOR—We furnish 1x6 or 8-inch No. 1 Fir Shiplap to cover floor.

EXTERIOR FINISH—All exterior finish, such as corner boards, fascia, frieze, cornice material, etc., will be supplied in No. 3 Clear Fir surfaced on all sides.

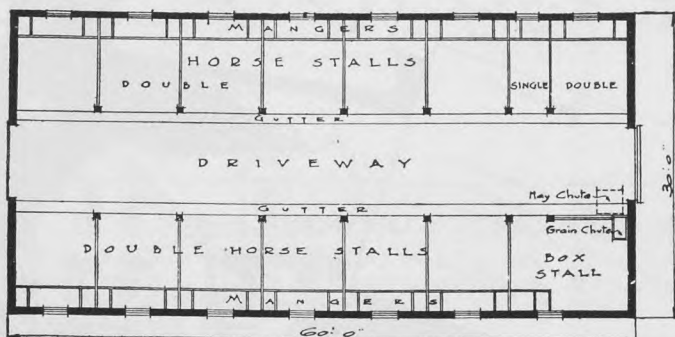

WINDOW FRAMES—Frames for all sash are to be made of 2-inch rabbeted stock, which we furnish in long lengths with standard sill and blind stop finished with 1x5 No. 3 Clear Fir outside casings.

DOOR MATERIAL—For all doors we furnish 1-inch stock of correct widths to form the rails and stiles for framing of doors and sufficient V-joint Ceiling to form panels, making doors 3-ply in thickness, all No. 3 clear stock.

STALL PARTITIONS AND MANGERS—Sufficient 2-inch material of suitable lengths to build the horse and cow stall partitions, as shown on the detail sheet accompanying plans, will be included in the bill. Manglers built of 2-inch plank front and 1-inch bottom with oat boxes.

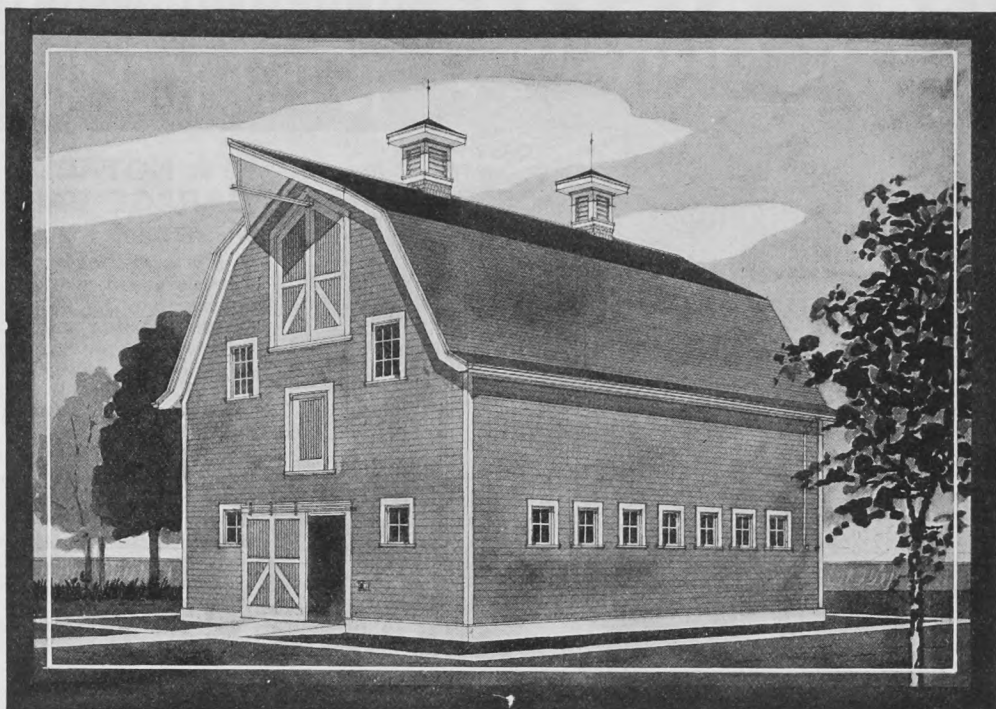

PLANK FLOORS—As all our Barn Plans are designed with a concrete floor, we do not include any plank flooring in our bills whatever, but upon receipt of particulars as to preference in method of laying sills and direction of floors, we will be pleased to estimate quantity of lumber required.

BOX STALLS—We furnish sufficient 2-inch plank to form partitions, also to line up the outside wall area to 5 feet above floor line; above this to be lined with 1-inch shiplap.

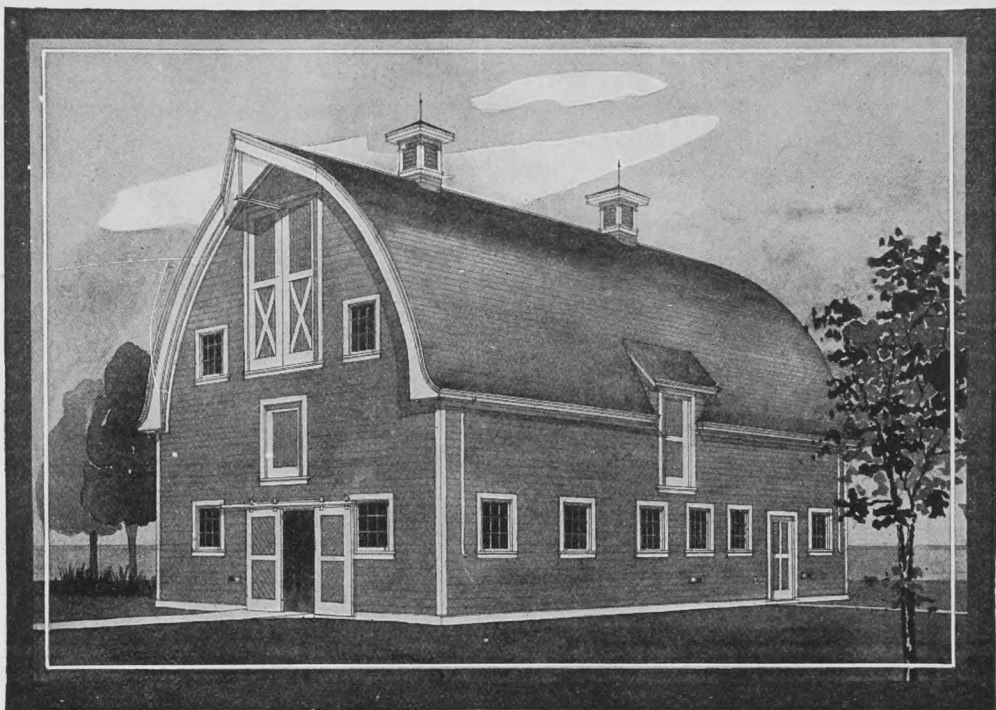

SAMPLE STALL ARRANGEMENT FOR AN AVERAGE HORSE BARN

Our barns lend themselves to almost any stall arrangement. Simply write us fully, the size and number of stalls and the outside design of barn you desire, and we will quote accordingly.

PRAIRIE CHOICE

METAL GARAGES IN SECTIONS, READY TO PUT TOGETHER

A NOTABLE GARAGE VALUE

SIZE: 10 x 16 x 8

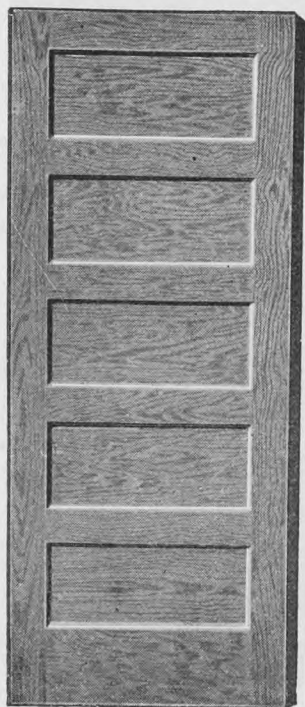

Ready to put together, and just the right size for an average car. This garage is of first quality galvanized steel, easy to put up, and a good looking garage when erected. A notable garage value for city or country use.

The doors are metal covered, with necessary hardware attached, ready to hang. The window is in one sheet, for roof, and can be opened for ventilation, and, being overhead, insures a good light. The galvanized iron is all cut to fit, and is sufficient to cover walls, roof and gables. Eavestrough and corner

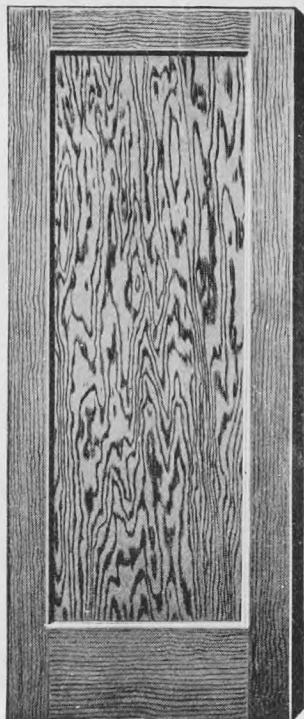

casings are included. All material is cut to fit and bundles are numbered. Simple instructions for erecting come with every garage.

DIAMOND READY ROOFING

GIVES ABSOLUTELY A TIGHT ROOF

A long-service roofing that is not affected by cold weather. No evaporating materials are used in the construction of this roofing. Has a smooth surface, with nothing to ooze out in hot weather.

The high quality of Diamond Ready Roofing will be maintained irrespective of cost; also we can positively guarantee that the prices we ask will be strictly EATON values, when quality is taken into consideration.

Diamond Ready Roofing is made in three different weights—all high quality—the only difference being thickness and weight. Full directions for laying, also sufficient nails and cement for laying are supplied with each roll; and it reaches you in the same perfect condition in which it is turned out by the factory.

This roofing is put up in rolls 36 ins. wide, containing 108 square feet—sufficient to cover 100 square feet of surface, allowing 8 square feet for lapping.

Install Your Wiring When Building and Save

With the increasing extension of electric power throughout the West, and the practical development of the individual farm lighting plants which may be used for farm homes isolated from town, it is now possible for an ever-growing number of homes to enjoy the benefits of electric lighting and the convenience of the other household labor-saving devices.

Although the probability of your early use of power may now seem remote, the time may not be so far distant when the transmission lines will be extended to your district, or you may find yourself in a position to tap the electric system of your nearest town or install your own electric lighting plant. You, as a progressive Western farmer, cannot afford to overlook this important matter, and you should also bear in mind the fact that you are adding considerably more to the resale value of your house than the mere cost of the electric wiring. The extra cost is small, but the benefits are many.

Let Us Help You Plan Your Lighting Scheme

Correct and artistic planning will add much to the comfort and appearance of the new home. Careful thought in placing the switches and service plugs for the vacuum cleaner, washing machine, toaster, iron and other labor-saving devices of the modern home will save many steps in time to come.

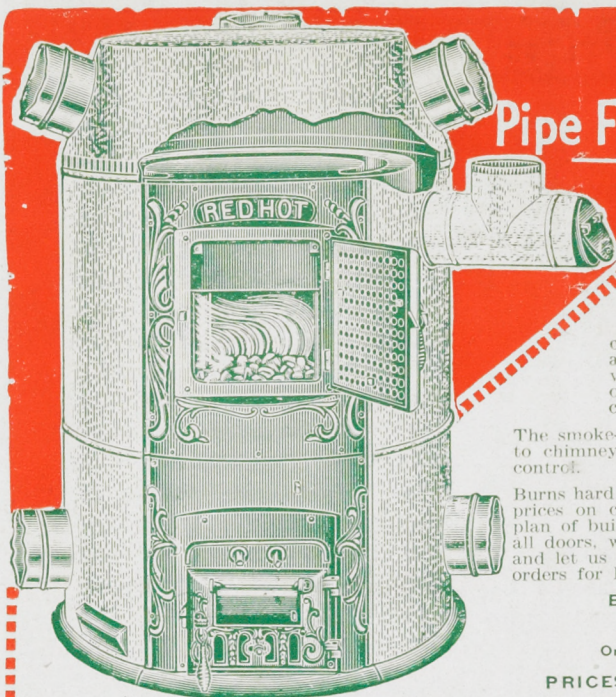

The designs and finishes of fixtures have changed considerably in the last few years. With this fact in mind, we have selected for our Electrical Fixtures Booklet an assortment of moderately priced and serviceable fixtures suitable for every room of the house, and embodying the latest in style and finish. A copy of this booklet will be sent you free on request. If you desire a lighting scheme in any particular color or period design, our House Furnishings Service Department will be pleased to advise you and give you fullest particulars regarding prices.

In the case where electricity will eventually be used, it is very important that the wiring should be installed when the building is in the course of erection, to ensure the wires being concealed within the walls. If this installation is deferred until the building is completed, it is practically impossible to avoid unsightly exposures of the wiring, and even so, the operation will be much more troublesome and costly.

The minimum cost of the materials—rubber-covered wire, porcelain knobs, screws, cleats, electric tape, solder, soldering paste and loom—for wiring any of the houses shown on pages 4, 5 and 6 of this booklet, will be in the neighborhood of \$30.00, but it must be borne in mind that this varies according to the numbers and locations of the lights, plugs and switches, which latter are not included in the above estimate.

Accordingly, we make individual quotations on each customer's own requirements.

When estimates for material are required send in a rough drawing showing location and number of lights and service plugs desired.

RED HOT

Pipe Furnace

**Delivers
Abundance of Heat
to All Parts of the House**

Built for heating every type of house, small size schools, halls and public buildings. Radiates abundance of heat for every room in the house. The long fire travel makes heating easy, and at the same time saves considerably on fuel. The **Red Hot Pipe Furnace** is an efficient furnace for general purposes. Our prices are very low, and, compared to prices on other furnaces of like capacity, offer an unusual opportunity to purchase a high-class furnace at a saving.

The smoke-pipe collar permits smoke-pipe from either side direct to chimney, giving a direct draft. The dampers give absolute control.

Burns hard coal, soft coal or wood. It is necessary for us to quote prices on complete heating plants in each separate case. Send plan of buildings, drawn to scale of 1/4 inch to one foot, showing all doors, windows, partitions, stairway and location of chimney, and let us give you an estimate. Three days are required to fill orders for heating plants.

RED HOT Pipeless Furnace

**An Efficient and Simple
Heating System**

Takes less space than pipe systems. Constant circulation of air keeps all rooms comfortably warm. Has great heating qualities, is easy to operate and is very economical on fuel. Our prices on the **Red Hot Pipeless Furnace** are exceptionally low for heating plants of this kind. The use of the **Red Hot Pipeless Furnace** eliminates tearing up the floors, walls and woodwork. The instructions for installing are accurately prepared, and show you how to put in the apparatus.

All sections of casings are numbered. Outer section galvanized iron; inner section of galvanized iron, lined with asbestos and tin. Furnace shipped complete, less smoke-pipe and elbows. Cut hole in main floor for register, then set your furnace in position in basement; have all joints cemented, assemble the casings, connect smoke-pipe, and the furnace is ready for use.

Clean-out door placed in centre at back. Triangular grate bars do away with raking and poking. Firepot in two sections, which takes care of expansion and contraction.

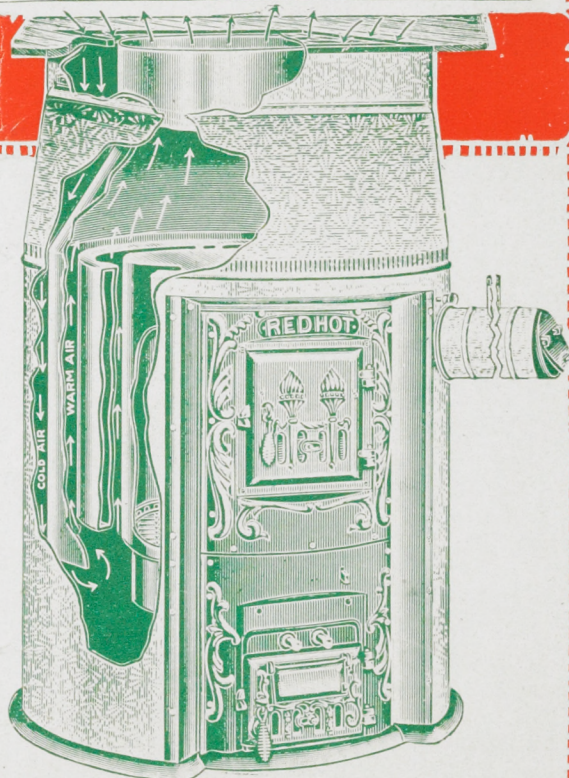

Send sketch of your house, drawn to scale of 1/4 inch to one foot, showing plan of rooms, stairway, etc., and we will advise and mark correct position for register.

Acome CAST IRON PIPELESS FURNACE

**Specially Designed for Burning
Western Soft Coal**

The large interior casings of the *Acome* contain a larger heating surface than most furnaces. The improved firepot and large grate make firing easy. The *Acome* delivers heat direct through a central register, and will give an even, comfortable warmth throughout your home, and, if needed, will deliver a great volume of heat in a short period of time. It is very efficient with soft coal, but will burn hard coal or wood.

The *Acome* installation is very simple. Central register is placed directly above the furnace. All you have to do is cut hole in main floor for register, place furnace in position in basement, connect smoke-pipe, and the furnace is ready for use.

THE *Acome* CAST-IRON PIPE FURNACE

**Specially Designed for Burning
Western Soft Coal**

The *Acome* has tremendous heating capacity, due to its large heating surface, which the burning gases come in contact with. The large combustion chamber is one of the features of the *Acome*. The joints are of the cup variety, and are sealed with asbestos cement, making joint-breaking almost impossible. The cup joints eliminate the possibility of a leaky furnace.

NOTE THESE DETAILS

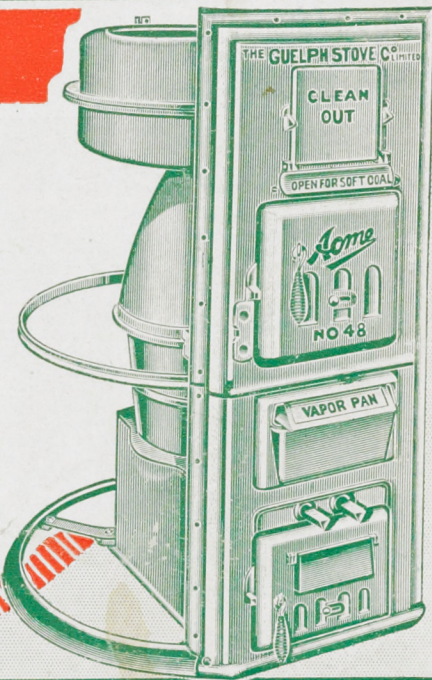

Ash Pit large and roomy.

Grate Bars are triangular and easy to operate.

Feed Door is 11½x11½ ins. Makes firing easy.

Water Pan is conveniently located below feed door in front of firepot, properly placed to provide moist, healthful heat.

Hot Blast Air Intake is directly over feed door, and should be open for burning soft coal and closed for burning hard coal or wood.
